

Vendor Managed Inventory

Improve your results through optimization and cost savings.

Loeb's Vendor Managed Inventory (VMI) service is a proactive vs. reactive material management solution focused on lowering your costs and increasing your productivity and efficiency. We have several options available to meet your needs, including cages, Conex trailers, and more, deployed to your jobsite or facility.

BENEFITS

- Consigned inventory, reducing your carrying and inventory costs
- Easily return what you don't use at the end—at no expense
- Simplify your stocking strategies and inventory planning
- Replenishment software options to meet your needs
- Improve your data insights, driving continuous improvement to your processes
 - Includes real-time inventory reports
- Save thousands in administration expenses¹
 - Convert hundreds of invoices to just one
 - Reduce number of purchase orders
- Increase team focus on installation through minimized disruptions and downtime
 - 5–7 days' worth of inventory, ready for use
 - Reduce frequency of last-minute orders
- Team of 20+ dedicated inventory specialists

Over 40% of a contractor's time in the field is spent on material handling. It's time to shutter this statistic with Loeb's VMI solutions.
