

# Electrical Distribution: Material Supply & Service

Never miss a grand opening date again due to an extended material lead time by partnering with the Loeb Electric team.

Our process is simple, strategic, and all about the customer: we start with an assessment of your electrical distribution design, reconfigure the design as needed in partnership with your engineer(s), then invest in your design by bringing your project materials into stock—eliminating long lead times and storing it securely for when you and your contractors need it.

Additionally, you can always count on:

- **Expert project management to ensure timelines are always met**
- **100+ years of combined gear expertise**
- **Medium (600V+) & low-voltage switchgear solutions**
- **\$5M+ material inventory available for immediate delivery**
- **Industry-leading, long-term manufacturer partnerships that provide:**
  - **National Account-level pricing & dedicated representation**
  - **Expanded manufacturer capabilities**
  - **Engineering services team collaboration**
- **Preventative maintenance solutions to minimize risk of arc flashes or fires**

Let's improve your electrical distribution material access today. Contact us at [info@loebelectric.com](mailto:info@loebelectric.com).
