

We Stock AND Program LED Drivers

Save time, money, and headaches.

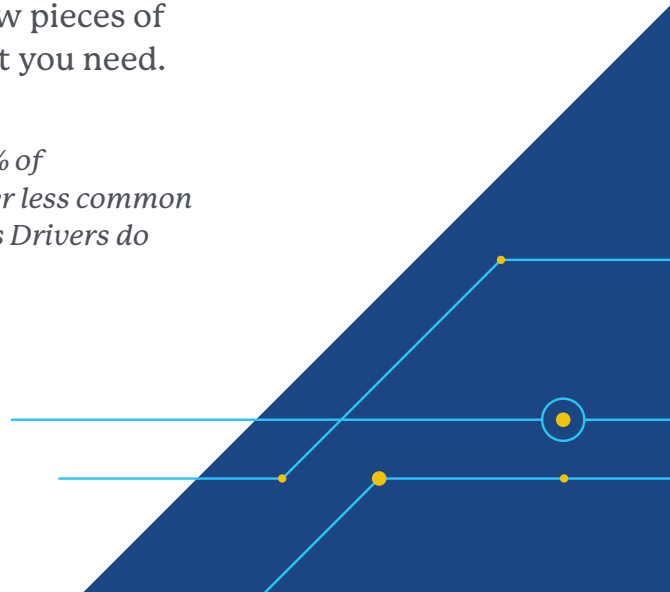

When an LED driver fails, finding a correct replacement can feel like looking for a needle in a haystack, if you can find it at all.

Loeb Electric offers a simple and fast solution for replacement drivers in existing linear, outdoor, and downlight type LED fixtures—there's no need to replace the whole fixture! Simply provide a few pieces of information on the old driver label and we'll get you what you need.

Our stocked programmable drivers will replace an estimated 90% of commercial lighting driver applications. Additional SKUs, to cover less common applications, are also available. Note: Advance by Signify Express Drivers do not work with TLEDs.

Programmable Drivers: Ordering Information

How do I order?

Call your Loeb sales representative, or 800.686.6351, to place an order.

What information do I need to place an order?

The labels found on the failed driver should provide all the information needed. Please take a picture of them prior to ordering.

If you are unable to read the label, please have the driver in hand when you phone your sales rep.

How fast can you ship my order?

Once we receive your order, it will take up to 48 hours to process depending upon the quantity and application needed. You can be assured the Loeb team will do everything possible to get your order to you as swiftly as possible.
